WORK EXPERIENCE

AWS Information Infrastructure Pre-Apprenticeship (I2PA) — Amazon Web Services,
Boardman/Hermiston, OR *May 2026 – June 2026*

- A 4-week, 120-hour program focused on careers to build, connect, power, and operate data centers.
- Demonstrated proficiency in hands-on skills with basic tools and materials for electrical, fiber, HVAC, and server construction and maintenance.
- Developed critical workplace skills including teamwork, problem solving, and time management.
- Met entry-level requirements for careers in information infrastructure.
- Earned OSHA 10 Certification and Amazon Web Services I2PA Certificate.

Custom Millwork Fabricator — Rift Studios, Brooklyn, NY *April 2026 – Present (On Approved Leave for AWS Technical Training)*

- Fabricated and installed custom built-in cabinets, shelving, and architectural millwork across residential and commercial properties throughout New York City.
- Worked out of a large fabrication shop in Navy Yard, Brooklyn, producing custom pieces to precise tolerances using blueprints, hand and power tools, and job-site safety standards.
- Maintained excellent standing and an open-door invitation to return, pausing active work exclusively to complete the full-time AWS I2PA cohort.

Sabbatical & Academic Focus — Rouen, France *Jan 2023 – Apr 2026*

- Relocated to France following the profitable exit of Trail Hazers, pursuing full-time academic study and language immersion.
- Completed a B.S. in Business Management and Leadership remotely through Colorado State University Global while simultaneously studying French at Alliance Française, Rouen.
- Completed select short-term consulting engagements, including building US-side operations for a Sri Lankan AI startup that opened early Department of Defense contract conversations, a HubSpot CRM migration for an EdTech company, and workflow redesign for a UK private insurance firm.

Founder & Owner — Trail Hazers LLC, Washington, DC

Jan 2019 – Dec 2023

- Founded and scaled an activewear and lifestyle brand to \$2.56M ARR without outside funding, operating as solo founder before building and managing a 6-person delivery team.
- Built customer retention as the primary growth KPI, prioritizing client experience and relationship quality over acquisition, resulting in a loyal repeat customer base that anchored the brand's revenue stability.
- Developed and managed partner and vendor relationships across retail locations throughout Washington DC and supplier networks nationwide to support logistics, fulfillment, and product development.
- Designed a custom booking platform that became the primary client hub and sold the company profitably to a competitor in 2023.

Valet & Quality Control Lead — Porsche Cars North America, Washington, DC *Sept 2018 – Aug 2019*

- After learning from management that repeat service complaints were increasing, proposed and personally implemented a pre-delivery road test protocol, taking completed vehicles out to stress-test systems before keys were returned to customers.
- Protocol was adopted facility-wide and proved so effective it became the primary function of the role, requiring a new hire to backfill original responsibilities.
- Supported a \$20M+ annual service operation serving the dealership's highest-value clients.

Operations Coordinator — Utah Olympic Park, Park City, UT *Mar 2017 – Feb 2018*

- Coordinated floor operations during nationally televised Olympic Qualifier events covering ski jumping, bobsled, and luge.
- Managed staff logistics, crowd flow, and safety across high-stakes competition weekends.

Special Projects Coordinator — The Lifshutz Companies, San Antonio, TX *Jan 2015 – Feb 2017*

- Embedded in daily operations on a mixed-use historic property redevelopment project.
- Coordinated vendor access, tracked deliveries, conducted site walkthroughs, and documented construction progress for off-site leadership.
- Assisted with permit filings, vendor paperwork, and expense reporting.

PROJECTS & HANDS-ON EXPERIENCE

Timber Framing Intensive — Heartwood School *April 2025*

- Built a two-story timber cabin structure using hand and power tools; gained experience with layout, joinery, and job-site coordination.

Technical Portfolio

- Culture Heat Map — Full-stack web application aggregating culture, compensation, and job data across 300+ companies into a single platform. Built with React, TypeScript, Node.js, and MySQL; integrated OpenAI for AI-powered recommendations and multiple external APIs for live data feeds.
- Additional projects in data visualization, workflow automation, and AI tooling. GitHub: github.com/martymcfli · Portfolio: omccormick.com
